EDUCATION

University of North Florida
Bachelor of Computer Science

Jacksonville, Florida
2016–2019

EXPERIENCE

nRollTech

Software Developer

Jacksonville, Florida
December 2019–present

- Full Stack Automation Development
- Technologies Used: Java, Cucumber, Selenium, SpringBoot, MongoDB
- Daily Tasks: Build both Java backend and Angular UI frontend to create test automation software which will aid in the internal dynamic testing of websites before their public release

University of North Florida

Teacher

Jacksonville, Florida
Summer 2019

- Taught two classes at the request of the chairman of the school of computing
- I instructed 30 high school students through a two week class on the basics of computing
- I taught skills such as core coding fundamentals and techniques using Java and Python, interacting with and manipulating hardware, how to interact with and use the Linux command line with a custom Raspberry Pi 3B+, and more

Radiology Associates of Tallahassee

Information Technology Internship

Tallahassee, Florida
Summer 2018

- Built and fixed medical work stations
- Diagnosed and mapped server racks
