## EDUCATION

---

**University of North Florida**  
Bachelor of Computer Science

Jacksonville, Florida  
2016–2019

## EXPERIENCE

---

**nRollTech**  
Software Developer

Jacksonville, Florida  
December 2019–present

- Full Stack Automation Development
- Technologies Used: Java, Cucumber, Selenium, SpringBoot, MongoDB
- Daily Tasks: Build both Java backend and Angular UI frontend to create test automation software which will aid in the internal dynamic testing of websites before their public release

**University of North Florida**  
Teacher

Jacksonville, Florida  
Summer 2019

- Taught two classes at the request of the chairman of the school of computing
- I instructed 30 high school students through a two week class on the basics of computing
- I taught skills such as core coding fundamentals and techniques using Java and Python, interacting with and manipulating hardware, how to interact with and use the Linux command line with a custom Raspberry Pi 3B+, and more

**Radiology Associates of Tallahassee**  
Information Technology Internship

Tallahassee, Florida  
Summer 2018

- Built and fixed medical work stations
- Diagnosed and mapped server racks
